MONO CHROM

HPL and solid grade (Compact)
through-colour laminate

Unique for its charm and quality, Monochrom® has been designed to enhance your most prestigious and refined projects in furniture-making and interior design.

- Invent contemporary spaces with our decorative through-colour solutions. Available in HPL and solid grade (Compact), Monochrom allows you to create clean lines without visible edges, thus bringing graphic modernity and infinite elegance to your spaces.
- Indulge your creativity with shades of deep black and pure white. Available in smooth and textured finishes which recreate the feel of natural materials, Monochrom Black & White plays with light and textures to enhance the beauty of your furniture or interior space.

Monochrom Compact Blanc Absolu - FA

High Pressure Laminate through-colour HPL

- Monochrom is available in thick HPL (1.2 mm), with a white or extra-black core and is available in six finishes: FA, BRIHG, Épimat, Roche, Alliage and Legno.
- Suitable for covering horizontal and vertical surfaces, Monochrom guarantees optimal results during assembly, eliminating the 'brown edge'. An essential asset to your high-end projects, it gives the furniture attractive lines and intense colour, with the added dimension of solid through colour.
- Its thickness gives it superior scratch and abrasion resistance suitable for intensive high wear use. Subject to regular external stresses, the surface will keep looking new for longer.
- The Blanc Absolu (absolute white) decor in FA is also available in post-forming HPL (0.6 mm) to allow you to make furniture with flush fitting sinks or basins or with curved shapes (up to a radius of 20 cm).

COMPACT

through-colour Compact (solid grade)

- Monochrom Compact is a freestanding thick HPL (8,10 and 12.5 mm) available with a white or extra-black core in three finishes: FA, BriHG and Roche.
- High quality material, it is the ultimate decorative solution for demanding interiors and for contemporary furniture design.
- Monochrom will enhance all aspects of your projects with its exceptional properties: impact and stain resistance, moisture and bacterial growth protection (Sanitized® treatment). It is perfectly suited to both horizontal (workstations, desks, etc.) and vertical applications (wall panels, doors, etc.).
- Freestanding and machinable throughout its entire thickness, Compact Monochrom is expected to inspire all creations. The aesthetic quality provided by its solid core becomes an exceptional design feature that will allow you to play with shapes and thicknesses and refine the lines of your furniture. For an optimal finish, its edges can be shaped, moulded, chamfered or bevelled.

MONOCHROM

Antibacterial decorative surface

Polyrey innovates to bring you reliable and eco-friendly decorative solutions:

- All our Monochrom panels benefit from active silver-ion based protection. The antiseptic action of silver is of significant benefit in the health, food or public sectors.
- Incorporated during the manufacturing process, silver ions effectively reduce the proliferation of bacteria throughout the life of the material. In contact with a bacterium such as *Staphylococcus aureus*, Ag⁺ ions neutralise it and prevent cell division, thus limiting the risk of infection.
- Suitable for food contact, the Sanitized® treatment remains stable. It contains no organic agents or nano-particles.

The Sanitized® antibacterial treatment destroys more than 99.9% of bacteria.

Effectiveness tested on on 7 different types of bacteria ⁽¹⁾:

- *Escherichia coli* ATCC 8739
- *Enterococcus hirae* ATCC 8043
- *Listeria monocytogenes* ATCC 15313
- *Staphylococcus aureus* (MRSA) ATCC 33592
- *Staphylococcus aureus* ATCC 6538
- *Salmonella enteritidis* ⁽²⁾ ATCC 13076
- *Mycobacterium smegmatis* ATCC 19420

⁽¹⁾ according to JIS 2801, a Japanese standard internationally recognised by the International Standardisation Organisation (ISO) - ⁽²⁾ 99,84% effectiveness
