

THE WORLD IN **ONE** COLLECTION

Curiosity is the drive of life

I spend many hours in planes, at airports, in cities both big and small. I like to meet new people and observe their behaviour and sense of humour.

With unfaltering curiosity I ask myself, are people indeed fundamentally different from each other?

I have discovered that regardless of cultural differences people have the same creative ability to visualise their own desires and dreams.

This discovery is what inspired our dream to create a diverse, international collection of furniture boards, full of vibrant colours and various structures.

A comprehensive collection that will give any space and furniture its individual character and style.

Fascinated, we began to work. While creating the ONE World collection we skillfully drew from our surroundings and combined traditional wood with modern and bold colours.

This is how our new collection came to be full of emotions, moods and experiences. Multidimensional, inspired by people and their desires it allows you to experiment and play with various styles: glamour for those who like glitter and contrast, classicism for those who favour timelessness, a rustic style for nature lovers....

We would like to welcome you on a fascinating journey through diverse concepts, styles and ideas.

A journey that will make your dream of having your own unique living space come true.

They say that **curiosity** is stronger than love.

It is with curiosity that everything started.

It has led us to many different places and introduced us to incredible people and their likes. This diversity of lifestyles inspired us to create a one of a kind collection of furniture boards.

While working with such a unique material like wood we often had to give thought to what it is that people want and need.

SWEDEN

The world in which you live in is filled with a full range of colours, emotions and sounds. With such a variety of styles available it is important to create a space for yourself that defines you.

It doesn't matter whether you live in Paris, Moscow or New York, there is nothing more pleasant than coming back home after a long day of work to a home in

which you can relax and find your sanctuary, to a place furnished in your style that expresses your personality.

This collection was created for you to feel ease, comfort and joy from creating your own space.

Emilia

ARCHITECT

The key to my profession is being curious of the world around me. I love observing people, places and events. When creating my reality I gain inspiration from the past. I read into it and let it influence the present.

The idea for my flat came from my desire of a living space that is simple yet personal.

One of the most beautiful colour duets in my interior is beige combined with the natural tint of wood. Skillfully combining traditional elements with modern solutions gives a unique and vibrant **rustic effect**. Warm colours and well-lit rooms decorated with contrasting elements give off a delightful unpretentious vibe.

Frédéric

RESTAURANT OWNER

My restaurant is a place to which people return. It's important for me that they feel very comfortable here. I provide an exquisite dining experience to my guests by preparing sophisticated dishes according to old recipes.

Just as sophisticated is the interior of the restaurant, it creates a unique experience both day and night. The sharpness of **industrial style** is counteracted with **the warmth and natural charm of wood**.

That's how a warm and friendly atmosphere has been created, in which endless conversations have been held while enjoying delicious dishes.

ENGINEER

Due to my profession, precision and innovation have a large influence on how I decorate my living space.

Since I live in a loft, a building re-adapted from an old factory, **industrial style** is what inspires me. I have combined elements of old brick with gray tones of concrete.

I am proud of my personal modern oak library which holds the entirety of my professional literature.

Elena

INTERIOR DESIGNER

I was born with a love for design. I enjoy playing with texture, form and colour. I travel all around the world, creating unique interiors for one of a kind people.

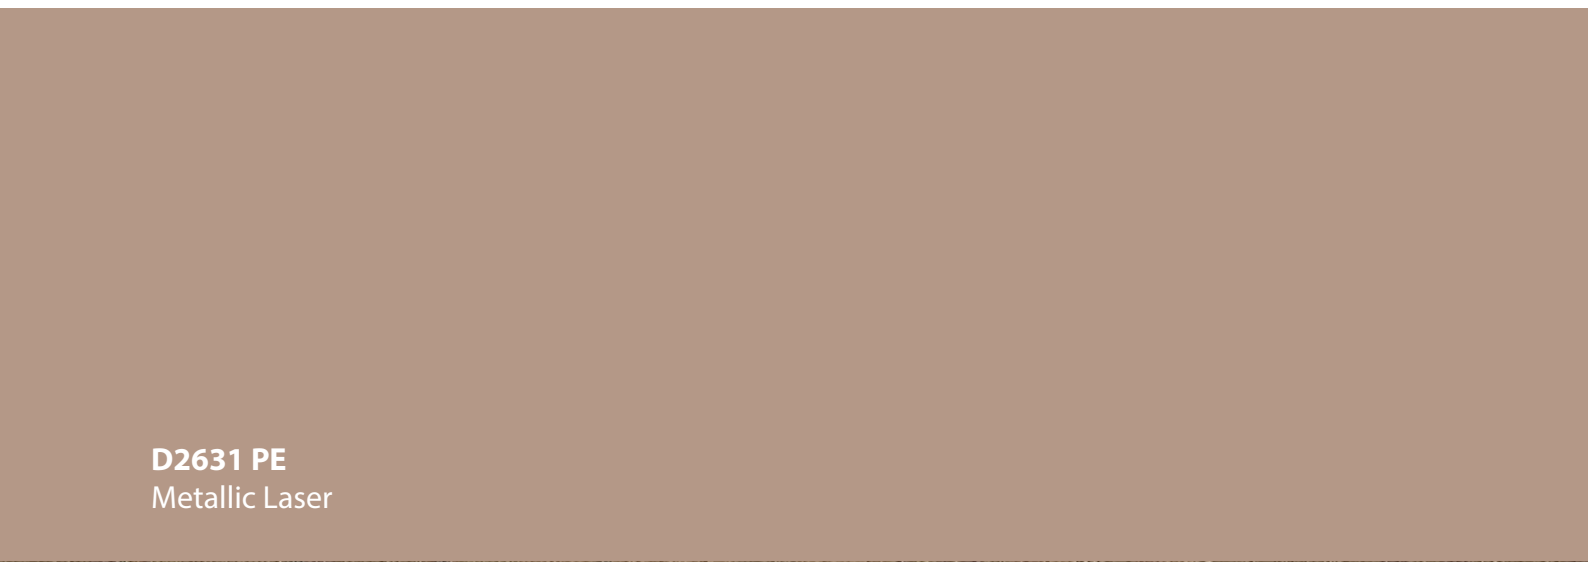

In my own apartment, which gives me a sense of ease and relaxation, **I combined modern and eccentric elements.**

I work with colours a lot that's why for a change I need serenity in my living space. To accomplish this I have chosen neutral tones of beige, gray and white.

A large, colorful collage representing 'The World in One Collection'. It features a grid of various images including people of different ages and ethnicities, landscapes, and abstract patterns. The collage is composed of many small rectangular tiles. At the top, a red banner reads 'THE WORLD IN ONE COLLECTION'. At the bottom left, the 'KRONO' logo is visible, and at the bottom right, the number '62' is displayed.

Swiss Krono Group

The tradition of the SWISS KRONO GROUP goes back to the year 1966 when the Austrian entrepreneur Ernst Kaindl founded a company in Menzau, Switzerland. That's how the company's history began, the company that has since then grown in strength and gained many valuable experiences. Thanks to regular investments following locations were established in different parts of Europe and around the world.

The owner's and employees' strong determination have given the company a top position in the wood-based material sector.

The dynamic growth of SWISS KRONO GROUP allows for the acquisition of new markets. Today the company's products are known in over 90 countries.

The combination of thoughtful investments and an experienced and ambitious team of employees guarantee the successful realisation of new ideas and dynamic growth in the future. The company employs 4500 people, whose engagement and professionalism create products and services of the highest quality.

Environment

Sustainable development and environmental protection have been playing a major role in the SWISS KRONO GROUP since its establishment. We believe in the compatibility of environmental protection, ecologically valuable products for healthier living and high-quality growth of our enterprise.

All companies of the SWISS KRONO GROUP consistently observe defined sustainability criteria for conserving natural resources.

The most important initiatives at our plants worldwide have included installing eco-filters and implementing ISO 14001 - compliant environmental management systems. We use state-of-the-art technologies to meet most of our energy needs from renewable sources while minimising the consumption of fossil fuels.

We attach great importance to the efficient and sustainable management of wood, which is a valuable natural resource. That is why we only use wood from reliable, FSC-certified sources and stress cascading use of it. All raw materials are used as efficiently as possible, followed by energy recovery and waste incineration only as a final measure.

Our corporate group's long-term strategy also includes additional investments to foster environmental protection and curb the use of natural resources.
